5)

A terminal window with a dark purple background. The title bar shows 'Activities', 'Terminal', and the date 'feb 10 23:43'. The terminal text shows a user running 'git merge feature' in the directory '~/Documents/UCR/RepositoriosGit/LaboratorioGit/gatosGit'. The output indicates an auto-merge attempt for 'gatosGit/gatos.py' which failed due to a content conflict. The message 'Automatic merge failed; fix conflicts and then commit the result.' is displayed, followed by a new command prompt.

```
fernandez@florentinhr-VM: ~/Documents/UCR/RepositoriosGit/LaboratorioGit/gatosGit
fernandez@florentinhr-VM:~/Documents/UCR/RepositoriosGit/LaboratorioGit/gatosGit$ git merge feature
Auto-merging gatosGit/gatos.py
CONFLICT (content): Merge conflict in gatosGit/gatos.py
Automatic merge failed; fix conflicts and then commit the result.
fernandez@florentinhr-VM:~/Documents/UCR/RepositoriosGit/LaboratorioGit/gatosGit$
```

Figura 1. Utilizacion del comando “git merge” para agregar la rama feature a la rama main.
